## Data Capture Specialists

### Newsletter

February 2010

We have told you about TSC printers in previous newsletters but today we are highlighting some of the advantages you will gain when you purchase. TSC are so confident that you will be pleased with their printers that they will ship a printer to you on a 30 day, sale or return basis (excludes desktop printers) for you to test. If you are not happy with the results then ship it back to them. We can also arrange maintenance contracts and media for you.

Take a look at some of the printers in the range and then call us on 01259 743424 for more information.
